

What is claimed is:

1. A *Bacillus natto* culture extract containing nattokinase and 1  $\mu\text{g}$  or less of vitamin K2/g dry weight.
2. A *Bacillus natto* culture extract containing nattokinase and 1  $\mu\text{g}$  or less of vitamin K2/g dry weight, obtained by a method which comprises culturing *Bacillus natto* in a liquid culture medium, and treating the culture medium obtained therefrom with chitosan.
3. The *Bacillus natto* culture extract of claim 1 or 2, wherein the *Bacillus natto* culture extract is in the form of a concentrated extract, a paste, a powder, a granule, a capsule, a drinkable preparation or a tablet.
4. A method for producing a *Bacillus natto* culture extract containing nattokinase and 1  $\mu\text{g}$  or less of vitamin K2/g dry weight, comprising culturing *Bacillus natto* in a liquid culture medium to obtain a cultured medium, and treating the cultured medium with chitosan.
5. A method for collecting vitamin K2, comprising treating a sample containing vitamin K2 with chitosan, and extracting the vitamin K2 adsorbed by the chitosan with an organic solvent.
